

Dear Health Care Provider:

Since 1992, **HCRnet, Inc.** has defined its mission to assist the healthcare industry in shifting from a paper-based information-processing environment to an easy to implement and easy to use electronic system. Since our inception, we have focused solely on the electronic capture, transmission and storage of time sensitive data for the healthcare industry. While doing so we continue to support our clients who still file paper transactions. As the deadline for compliance with the Administrative Simplification title of the Health Insurance Portability and Accountability Act approaches, we have set goals to become the definitive source of HIPAA compliance assistance in Nevada.

**HCRnet, Inc.** is the largest electronic clearinghouse for medical claims and encounters in the State of Nevada. Through the strength of our network that links providers, EDI service vendors and payers, our transaction volume exceeded two million in 2001 and will grow more than 100% in 2002. **HCRnet, Inc.** is recognized as an organization dedicated to quality, efficiency and accuracy.

In 2001, **HCRnet, Inc.** committed substantial resources to updating and improving our systems to enable us to meet the growing need for electronic data interchange in the healthcare industry while maintaining the high level of quality service our clients have come to expect and depend upon. These improvements have poised us to move forward into the 21<sup>st</sup> century as a leader in the EDI market.

In an ever-changing industry that has new technology and new opportunities appearing daily, you need a company that responds to this changing environment quickly and makes the transition easy for you. **HCRnet, Inc.** is that company. We are constantly expanding our network with innovative new products and services designed to improve your efficiency and productivity and will continue to do so.

At present, we are accepting all medical claims and encounters electronically, and transmit them either electronically or on paper as determined by the needs of the payer. We also process patient statements electronically to facilitate your billing process at a very competitive price.

Today's high costs of healthcare services require that you make proper informed decisions regarding the service companies you select. **HCRnet, Inc.** can save you time and money. Please give us the opportunity to prove that we can.

Sincerely,

Lee A. Stickney CDP  
Chief Executive Officer
